Developed under the supervision of 8 physicians with extensive experience in treating transgender patients
Annotated and updated as new data is available and validated

The Center of Excellence for Transgender Health (CoE) combines the unique strengths and resources of a nationally renowned training and capacity building institution, the Pacific AIDS Education and Training Center (PAETC), and an internationally recognized leader in HIV prevention research, the Center for AIDS Prevention Studies (CAPS), both of which are housed at the University of California San Francisco, one of the top five medical research and educational institutions in the United States. The mission of the CoE is to increase access to comprehensive, effective, and affirming health care services for our trans and gender-variant communities.
